

SCOTTISH AND SOUTHERN ELECTRIC (SSE)

Framework Agreement for Distribution OHL Works – up to 33kV

Overview

In 2015, Omexom was successful in bidding to renew its Distribution Over Head Lines Framework with SSE Energy Networks.

Under the Framework Omexom will deliver 33kV, 11kV and LV Overhead Line Works. The contract award to provide services in all regions of Scotland includes equipment installation, conductor installation, pole replacement, upgrading of equipment and assets and clearance rectification works.

In addition Omexom will continue to assist Scottish & Southern Energy in restoring power to its customers after severe storm conditions.

The project will be managed by our experienced team based in Dunning, Perthshire.

IMPLEMENTATION

Activity

Distribution Overhead Line Works
