

OMEXOM
POWER & GRID

An expert in energy and information technology, VINCI Energies (65,400 employees and revenues of 10.2 billion Euros) designs, carries out and maintains solutions for industry, services and local authorities.

Omexom in the UK & RoI delivers on the promise of the energy transition. From the design stage to maintenance, Omexom covers the full range of electricity infrastructure needs in Generation, Transmission, and Distribution as well as Substations. Omexom is totally independent when it comes to promoting technological options. With its expertise and in-depth knowledge of client processes, Omexom always chooses the best solutions to meet client expectations. Omexom is a VINCI Energies brand.

Lineworker - DOHL - Scotland

ROLE

Omexom UK & RoI invite applications from experienced Overhead Lines operatives for work on the Scottish and Southern Energy Overhead Line framework. All LE1 Linesmen must be suitably experienced and competent to work unsupervised.

Working principally from a MEWP (Mobile Elevated Work Platform) but physically climbing LV Poles as required, you will be required to be able to carry out duties as outlined below.

Overhead Line duties associated with LV systems including:

- Installation of open wire and ABC bundled conductor
- Live Line Pole erection
- Pole erection
- Dressing poles
- Installation of stay blocks and stay wires
- Replacing aerial/service conductors
- Replacing customer cut outs
- Carrying out Polarity, Phase Rotation and Earth Loop Impedance tests

Overhead Line duties associated with HV systems including:

- Installation of conductor
- Pole erection
- Dressing poles
- Removal/replacing pole mounted equipment including ABSD, PMR, Transformers, ASL's

In carrying out all of the above duties ensure that all actions are performed in line with SSE/Omexom approved work practices and safety procedures.
